

# Building Product Information Sheet

## Class 1

Benchtops: Patagonia D4221 Natural Brazilian Marble

Building Product Information Requirements (BPIR)

Version: 1

Date Created: November 2024

Prdouct Name	Patagonia D4221 Natural Brazilian Marble
Product Identifier	Patagonia D4221

Product Scope and Its Intended use

Patagonia D4221 is a stunning natural Brazilian marble known for its unique blend of earthy tones and intricate veining, which create an elegant visual impact in any setting. Its light-transmitting properties make it particularly special, allowing the stone to reveal a glowing, ethereal quality when backlit. This marble is highly versatile and can be used for various interior applications, including **kitchen benchtops**, where its durability and beauty enhance both function and style. It is also a popular choice for bathroom vanities, feature walls, and flooring, adding a touch of luxury to residential or commercial spaces. Patagonia D4221 is especially well-suited for backlit installations, such as illuminated wall panels or bar fronts, where its translucent quality can create a dramatic effect. Like all natural stones, it requires proper sealing and maintenance to protect its beauty and ensure long-lasting performance, with regular cleaning and avoiding exposure to acidic substances helping to maintain its pristine appearance over time.

## Building Code Clauses and contribution

B2 Durability – B2.3.1(c) , F2 Hazardous Building Material – F2.3.1, G1 Personal Hygiene- G1.3.2, G12-Water Supplier – G12.3.2, G12.3.5

## Statement of Contribute to Compliance

This product is an essential component of a building's plumbing system, designed to control water flow at a designated endpoint (**B2 Durability**). It is easily accessible and replaceable, with any potential failure being quickly noticeable during normal use (**B2 Durability**). Its surfaces, which may come into contact with moisture or contamination, are non-porous and easy to clean, ensuring the product remains hygienic (**E3 Internal Moisture**). Constructed from safe materials, it does not emit harmful substances from exposed surfaces (**F2 Hazardous Building Materials**). As a sanitary fixture, this product is intended for installation with a plumbing and drainage system, meeting requirements for "Foul Water" disposal under G13 regulations (**G1 Personal Hygiene**). It is specifically designed to facilitate proper sanitation while allowing for efficient cleaning and maintenance (**G1 Personal Hygiene**).
